Woods® FZ27 Mower Combines Comfort and Performance

The new FZ27 commercial zero-turn mower from Woods Equipment combines comfort and performance. The front-mount mowers have cutting decks mounted in front of the power unit, improving visibility and making it easier to trim around and cut under low growing trees and foliage.

With a long wheelbase, the FZ27 distributes weight more evenly. The full suspension adjustable seat is a standard feature which reduces operator fatigue, allowing hours of mowing comfort.

A TrueFloat™ deck follows the contour of the ground for an unparalleled even cut. It is available with a 54- or 61-inch deck, and the operator can electronically adjust the cutting height between one and five inches. The deck design features an ultra-durable fabricated 5-inch deep deck with welded bumper. A patented V-Baffle system creates strong suction, lifting grass in front of the cutting chamber for a precision cut.

The mower is built with a 27 hp Kohler V-Twin OHV gas engine, a cup holder and flip-up seat. Additional features include an hour meter, and a flexible ShrubSaver discharge chute. A standard roll-over protection system (ROPS) adds to operator safety.

A Woods FZ-Series mower can do more than cut grass. Owners will find year-round versatility and be more productive with attachments like a grass and leaf collection system, 60-inch dozer blade, snow thrower, and broom models with fixed or adjustable angles. Accessories include a headlight kit to extend working hours, and a winter enclosure to stay warmer while moving snow. Stay cooler with an optional sunshade. Operators will ride in greater comfort with an extended footrest (which will not work with winter enclosure, blade or broom).
